Technical Data Sheet

Product Name	Bitolylene diisocyanate
Synonyms	TODI
CAS No	91-97-4
Molecular Structure	
Specification	Under the normal atmospheric temperature is a white firm form particle , Flash point: 218 °C ,melting point: 70-72 °C ; Boiling Point: 195-197 °C(667Pa), Specific Gravity/Density(80 °C): 1.197 g/cm ³ Content ≥ 99%
Application	Used as intermediate
Hazard Class	Non-dangerous goods
Packing	In 20kg Cardboard Barrel , Aluminium Foil Liner Inside
