KEMIACHEM CO., LIMITED.

Technical Data Sheet

Product name: DITHIOPHOSPHATE 31

Specifications:

| Item | Specification |
|------------------------|---------------------------|
| Appearance | Vandyke brown oily liquid |
| Density (d_4^{20}) | 1.18-1.25 |
| Mineral substances % | 60-70 |

Application: Used as the flotation collector for sphalerite, the galena and the silver ore, and may be used in the flotation process of oxidizing the gold ore and the silicon green copper ore, also has the collecting function to the oxidizes lead ore , and with some foaming, the performance is better than dithiophosphate 25.

Packaging: Plastic drum & iron drum, net weight 200kg / drum.

Storage: Store in a cool, dry, ventilated warehouse.

Note: According to the customers' specifications and packaging requirements.
