Technical Data Sheet

Product name: AMMONIUM DIBUTYL DITHIOPHOSPHATE

Molecular formula: $(C_4H_9O)_2PSS \cdot NH_4$

Main content: Ammonium dibutyl dithiophosphate

Specifications:

Item	Specification	
	Grade 1	Grade 2
Appearance	White to iron grey powder	
Insoluble %, \leq	0.5	1.2
Mineral substances %, \geq	95	91

Application: Used as the flotation collector and frother for copper, lead, nickel, silver sulphide ore and the activated zinc sulphide ore, has a good selectivity for the separation of copper and zinc or lead and zinc, also is conducive for the recovery of platinum, gold and silver.

Packaging: Iron drum, net weight 125kg / drum; woven bag, net weight 40kg / Bag.

Storage: Store in a cool, dry, ventilated warehouse.

Note: According to the customers' specifications and packaging requirements.
