KEMIACHEM CO., LIMITED.

Technical Data Sheet

Product Name	Ferric Chloride Anhydrous
Synonyms	Ferric Chloride
CAS No	7705-08-0
Molecular Formula	FeCl ₃
Specification	Appearance: Dark brown powder Description: Content of Ferric Chloride(FeCl ₃): 96.0% min Content of Ferrous Chloride(FeCl ₂): 2.0% max Content of Insoluble Substance: 1.5% max
Hazard Class	UN NO.:1773 , CLASS: 8
Application	Mainly used for the engraving etching of electronic circuit board or purify drink water and treat waste water. It is also used to make other iron salts, oxidant, catalyst, mordant and ink. In addition, it is used in construction field.
Packing	50KGS net iron drum
Quantity / 20'FCL	22.5 MTS
