Technical Data Sheet

Product Name	Sucralose	
Synonyms	1,6-Dichloro-1,6-dideoxy-beta-d-fructofuranosyl4-chloro-4-deoxy-alpha-d-gala; Ctopyranoside; Alpha-d-galactopyranoside	
CAS No	56038-13-2	
Molecular Structure		
Specification	Appearance: White or Almost White Crystalline Powder Boiling Point : 104-107 °C Density : 1.375 g/cm	
Application	Sucralose is 600-650 times sweeter than sucrose which is usually used in baked food, baking mixes, non-alcoholic beverage, chewing gum, medicine, daily necessities, table sweeteners which does not cause microbial fermentation. It is food safety without toxic side-effects.	
Hazard Class	Non-dangerous goods	
Packing	25kg/drum	
Quantity / 20'FCL
