KEMIACHEM CO., LIMITED.

Technical Data Sheet

Product Name	Vitamin E Acetate	
Synonyms	Tocopheryl acetate; Alpha-tocopheryl acetate	
CAS No	7695-91-2	
Molecular Structure		
Specification	Appearance: pale yellow viscous liquid Melting Point : -28°C Boiling Point : 224 °C Storage Temp. : 2-8°C	
Application	Vitamin E Acetate is used in medicine industry and cosmetics. In medicine, Vitamin E Acetate is mainly used to treat arteriosclerosis, coronary disease, burn, etc. Vitamin E Acetate can also be used in cosmetics to moist skin, keep water content, also has effects to protect human from ultraviolet injury.	
Hazard Class	Non-dangerous goods	
Packing	25kg/drum, 1kg/tin	
Quantity / 20'FCL
