KEMIACHEM CO., LIMITED.

Technical Data Sheet

Product Name	Nicotinamide(VB3)	
Synonyms	3-Pyridinecarboxamide; 3-Pyridine carboxylic acid amide; 3-Pyridenecarboxylic amide	
CAS No	98-92-0	
Molecular Structure		
Specification	Appearance: White needle crystalline powder Melting point: 128-131°C Boiling point: 150-160°C Flash point: 182°C Water solubility: 1000 g/L (20°C)	
Application	Niacinamide USP is used as food additive for multivitamin preparations. It is also used as intermediate for pharmaceuticals and cosmetics.	
Hazard Class	Non-dangerous goods	
Packing	25kgs/drum	
Quantity / 20'FCL
