KEMIACHEM CO., LIMITED.

Technical Data Sheet

Product Name	Benzyl Benzoate	
Synonyms	Benzyl benzene carboxylate; Benzyl phenylformate	
CAS No	120-51-4	
Molecular Structure		
Specification	Appearance: colorless oily liquid Purity: 99.0% min Acidity: 0.3 mgkoh/g max Refractive index: 1.568-1.570 Melting point: 17°C Specific gravity: 1.118-1.122 g/cm3 Sulphate ash: 0.1% max Water: 0.2% max	
Application	Used for the synthesis of drugs (especially for antispasmodic drugs as a scabicides and to treat pediculosis). Benzyl benzoate finds application in fragrance, is used in pre-fixing agent. It is used as a miticide and in food field. It is also used as a plasticizer for polymers and cellulose	
Hazard Class	Non-dangerous goods	
Packing	220kg Net Plastic Drum	
Quantity /20'FCL	17.6mts
