KEMIACHEM CO., LIMITED.

Technical Data Sheet

Product Name	Vitamin A Acetate	
Synonyms	Retinol acetate; Trans-retinol acetate	
CAS No	127-47-9	
Molecular Structure		
Specification	Appearance: pale yellow crystalline Melting Point: 57-58 °C Water Solubility : soluble Solubility : absolute ethanol	
Application	Vitamin A Acetate is used in Vitamin A deficiency. It can improve skin elasticity, promote skin regeneration. Vitamin A is used in skin protection, anti-wrinkle, whitening cosmetics.	
Hazard Class	Non-dangerous goods	
Packing	20kgs/drum, 5kgs/AF bag	
Quantity / 20'FCL
