Technical Data Sheet

Product Name	Vitamin D3	
Synonyms	Racumin D; Oleovitamin D3	
CAS No	67-97-0	
Molecular Structure		
Specification	Appearance: white columnar crystal or crystalline powder Melting Point: 82-87°C Alpha: 105° (c=0.8, EtOH 25°C) Water Solubility: <0.1 g/L (20°C)	
Application	Vitamin D3 is used to treat rickets and osteomalacia as it can promote the absorption and deposition of Ca and P in intestines.	
Hazard Class	Non-dangerous goods	
Packing	25kgs/tin/carton	
Quantity / 20'FCL
