Technical Data Sheet

Product Name	RUTIN	
Plant Origin	<i>Sophora japonica L.</i>	
CAS No	153-18-4	
Part Used	FLOWER	
Specification	NF11, DAB	
Application	1. Anti-inflammatory action: apparent suppression of inflammation due to planted wool when the product is injected into abdominal cavity. Sodium rutin sulfate has very strong anti-inflammatory action to edema in rat. 2. Vitamin P like action: maintain the strength of blood vessel, reduce its permeability and brittleness; degreasing action to liver soaked in fat, esp. when used with glutathione. 3. Antiviral action: best suppression to phlyctenular stomatitis virus at product concentration of 200g/ml. 4. Inhibition of aldehyde reductase	
Hazard Class	Non-dangerous goods	
Packing	25KGS/DRUM	
Quantity / 20'FCL
