## Technical Data Sheet

<b>Product Name</b>	GREEN TEA EXTRACT	
<b>Plant Origin</b>	<i>Camellia Sinensis</i>	
<b>Part Used</b>	Leaf	
<b>Specification</b>	Three active ingredients in the Green tea: Polyphenols, Catechins and EGCG, do different purity according to the clients' requirement:	
<b>Application</b>	<p>Green tea is the second largest beverage demanded by consumers worldwide. Used in China and India for its medicinal effects. There are several compounds extracted from green tea including catechins which contain an enormous amount of hydroxyphenols that are easily oxidized, congregated and contracted, which explains its good anti-oxidation effect. Its anti-oxidation effect is 25-100 times as strong as those of vitamin C and E. It is widely used in medicines, agriculture, and chemical and food industries. This extract prevents cardio-vascular disease, lowers the risk of cancer, and decreases blood sugar and blood pressure, as well as viruses.</p>	
<b>Hazard Class</b>	Non-dangerous goods	
<b>Packing</b>	25KGS/DRUM	
<b>Quantity /20'FCL</b>
