Technical Data Sheet

Product Name	Tetrabromophthalic Anhydride(TBPA)	
Synonyms	1,3-Isobenzofurandione,4,5,6,7-tetrabromo-;1,3-Isobenzofurandione,4,5,6,7-tetrabromo-;	
CAS No	632-79-1	
Molecular Structure		
Specification	APPEARANCE white or light yellow powder BR 67%min M.P. 270°C min SULPHATE 0.3%max MOISTURE 0.2%max	
Application	It is flame retardant additive with high bromine content and provides a cost effective solution to flame retardant formulations in a wide range of applications. It is used in elastomers, wire & cable, textile coatings, business machines and television cabinets formulations. flame retardant is particularly effective in polyolefins, styrenic, polyamide, HIPS, and polyester resins.	
Hazard Class	Non-dangerous goods	
Packing	IN 500KGS OR 1000KGS NET EXPORT WORTHY BAG,	
Quantity / 20'FCL	20MTS
