Technical Data Sheet

Product Name	TETRACHLOROPHTHALIC ANHYDRIDE	
Synonyms	TCPA; 4,5,6,7-TETRACHLORO-1,3-ISOBENZOFURANDIONE; NIATHAL	
CAS No	117-08-8	
Molecular Structure		
Specification	Appearance : White crystal or powder Content 99.0% min Melting point 255-258℃ Loss on drying 0.5% min APHA color 150# max Free acid 0.5% max Free chlorine 10PPMmax Iron 10PPM max Solubility in xylene Completely Soluble	
Application	As phthalocyanine green pigments and dye intermediates accounted for tons of systems, but also the raw material of alkyd resin	
Hazard Class	Non-dangerous goods	
Packing	900kg plastic woven bag	
Quantity / 20'FCL	18MTS
