Technical Data Sheet

Product Name	Antimony Trioxide	
Synonyms	Antimonious Oxide; Antimony Peroxide	
CAS No	1309-64-4	
Molecular Structure	Sb_2O_3	
Specification	Appearance: white fine powder, Sb_2O_3: 99.5% min., As_2O_3: 0.06% max., PbO: 0.1% max., Fe_2O_3: 0.006%max., CuO: 0.006%max., Se: 0.005% max., Whiteness: 93 % min.,Particle size(um):0.8 – 1.2	
Application	Typical applications for antimony trioxide include flame retardant synergist for use in plastics, rubber, paints, paper, textiles, and electronics; polyethylene terephthalate polymerization catalyst; a clarifying agent for glass; an opacifier for porcelain and enamel; and a white pigment for paint.	
Hazard Class	Non-dangerous cargo	
Packing	In 25kgs or 1,000kgs net bag.	
Quantity /20'FCL	20mts/FCL
